CCS Midstream Services celebrates the opening of the Buck Creek TRD facility

Calgary, June 3, 2010 – CCS Midstream Services is hosting an open house to celebrate the new Buck Creek Treatment, Recovery and Disposal facility on Monday, June 7 from 12:00pm to 4:00pm. This event is open to the public and will be held at the facility located 35 kilometres Southeast of Drayton Valley, Alberta on Highway 22. Attendees will participate in guided tours and enjoy a barbeque.

“We have the experience, the technology and the amazing people who are committed to providing the best customer service,” said Brian Huseby, CCS Facility Manager. “Our TRD model offers a number of unique services including an area to steam and flush trucks, equipment cleaning, and a riser system that allows multiple trucks to unload at the same time.”

Brian is excited about this new facility and its location. It is open from 6:00am to midnight and is pipeline-connected. The TRD has several local residents as CCS employees.

CCS Midstream Services is a division of CCS Corporation, a recognized industry leader providing integrated and environmentally responsible services to upstream and downstream oil and gas companies in Canada and the U.S. CCS' state-of-the-art facilities treat, recover and dispose of all upstream petroleum wastes from initial drilling to production. Handling drilling mud, completion fluids and tank bottom sludge, the TRDs separate oilfield waste materials into three streams: recoverable hydrocarbons, waste water and solids. In addition, CCS facilities provide emulsion treatment, clean-oil terminalling, water disposal and heavy oil optimization. CCS utilizes the Shaker / Tecumseh Centrifuge Technology and maximizes the effects of heat & gravitational force to separate the waste, leading to improved recovery of valuable hydrocarbons and fewer residual wastes.

About CCS Corporation

CCS Corporation is a recognized industry leader providing integrated, environmentally responsible solutions in Canada and the U.S. Headquartered in Calgary, AB, CCS has almost 2,600 employees and provides a diverse number of services across four divisions. CCS Midstream Services provides oilfield waste treatment, recovery and disposal (TRD) through a network of facilities across Western. This includes TRD facilities, engineered landfills and disposal caverns. CCS Energy Marketing provides crude oil and condensate marketing services. HAZCO Environmental Services offers integrated remediation, waste management, NORM management and decommissioning solutions throughout Canada. Concord Well Servicing manages well completions, workovers and abandonments with a fleet of 139 service rigs. Additional integrated services include regulatory compliance expertise, inactive well management, well and pipeline abandonments, oilfield equipment rental, metals recycling and geotechnical and environmental drilling.
